

## Thurs 14th May 2015 – Thixendale Village Hall

An illustrated talk by Dr Peter Halkon

### "Recent Research on the Iron Age and Roman Landscapes of the Western Wolds"

Dr Peter Halkon's talk focused on the villages of the western Wolds. He spoke enthusiastically about all aspects of the subject, keeping the audience enthralled.

The talk began with an examination of the geology and terrain of the area.

He then moved on to look in detail at various sites that have been explored.

The excavation of an ancient cemetery in Pocklington found skeletons arranged in a foetal position.

The one shown here has a spear-head embedded.
